

AGNIESZKA WÓJCIK

FRONT-END DEVELOPER

INTRODUCTION

Hi, I'm Agnieszka. I have over two years of commercial experience as a Junior Front-End Developer. In AC Project I have broadened my knowledge of Javascript and its framework Ember.js, React.js, SASS and code testing. I also learned how to work in a team of several people focused on the delivery of one large project designed for the hotel industry. By working in Multi-Design Studio I got experience in HTML, SCSS, Photoshop and PHP. It was much smaller team and we worked on several smaller projects for individual customers based on CMS Wordpress.

EXPERIENCE

JUNIOR FRONT-END DEVELOPER | AC PROJECT

April 2017 - February 2019

The company I was working for created an app for hospitality industry. On daily basis, I wrote front-end code and managed various things related to front-end layer of this application, such as communication with back-end via REST and refactoring the existing code. On a daily basis I was responsible for delivering business functionalities, consulting projects with designers, creating components documentation and writing integration and acceptance tests. Most of the time we were writing an app using Ember.js, but we also had a POC with React.js that lasted three months.

FRONT-END DEVELOPER | MULTI DESIGN STUDIO

November 2016 - March 2017

I was responsible for development of front-end layers of websites, creating and maintaining Wordpress based sites and modifying Plugins and Templates. I have advised in the area of website designs creation. Sample websites are available at <http://prefkon.pl/> <http://redgarden.pl/blog/> <http://sw-c.pl/>

SKILLS

HTML / CSS / RWD	JAVASCRIPT
PHOTOSHOP	EMBER.JS
REACT	GITHUB / GITLAB
QUNIT	DOCKER
REST API	JQUERY
